How to reinstall OS

You can do it yourself

Go to [VPS hosting](#) page and select the server for which you want to reinstall the operating system

The screenshot shows a client dashboard with a sidebar on the left containing sections: Client (Profile, Payers, Domain contacts, Affiliate program, Contracts, Cart, Orders, Discounts, User settings), Products/Services (VPS hosting, Domains, SSL certificates, Domain parking, ISPsystem licenses), and Billing (Auto payment, Payments, Expenses). The main area displays a table of VPS hosting services. A red box highlights the first row, and a red arrow points to the 'Edit' button above it.

Id	Main IP	Hostname	Tariff plan	Data center	End date	Status
182145	91.221.37.242	s182145.cloud.flynet.pro	Cloud VPS 1	Флайнет	2020-02-25	Active

Select the server for which you want to reinstall the operating system

and click the Edit button

This screenshot is similar to the previous one, but with a red box highlighting the 'Edit' button in the top toolbar and a red arrow pointing to it. The table below it shows the same server entry.

Id	Main IP	Hostname	Tariff plan	Data center	End date	Status
182145	91.221.37.242	s182145.cloud.flynet.pro	Cloud VPS 1	Флайнет	2020-02-25	Active

click the change button

Next, select from dropdown menu new operating system you want to install
