and check "**Reinstall OS**" checkbox.

**Main settings**

Auto renewal ..... **0.00 RUB per month** ?

Creation date ..... **2019-03-29** ?

Expiration date ..... **2020-02-25** ?

Main IP ..... **91.221.37.242**

Hostname ..... **s182145.cloud.flynet.pro**

Password .....  ? ✓

Reset root password

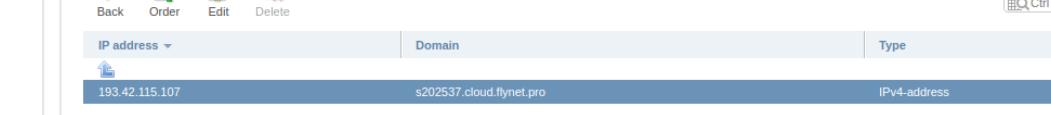

Reinstall OS ?

**Add-ons**

Operating system ..... **Debian 10 (0.00 RUB per month)** ?

Click "Ok" button at the bottom of the page.

After reinstallation completed, your server goes into **active** state.

The screenshot shows the 'Client' section of a web application. On the left, there's a sidebar with links for 'Client', 'Products/Services', and 'Billing'. The main area displays a table of IP addresses. The table has columns for 'IP address', 'Domain', 'Type', and 'Status'. One row is selected, highlighting the 'Status' column which contains the value 'Active'. The 'Status' column is outlined with a red box.

IP address	Domain	Type	Status
193.42.115.107	s202537.cloud.flynet.pro	IPv4-address	Active
