

Where is your datacenter located?

Our data center and office are located in the IT capital of Russia, Tomsk. This is a Siberian region. It's always cold here. Therefore, we significantly save on cooling our servers, making them cheaper for you.

The main optical communication channels between Europe and Asia also pass through our data center. We have a strong and fast connection with the entire Eurasian continent.

All IP addresses of our servers are geographically located in Russia.

We do not have data centers in other countries or cities.

Unique solution ID: #1013
